

BIO-SECURITY PROCEDURES

AT DHI HEAD OFFICE

All our equipment is cleaned and disinfected before we come onto your farm. Our cattle crushes are cleaned with a high-pressure steam cleaner and then sprayed with **Virkon S**.

- Ultimate safe disinfectant kills all viruses known to affect animals
- Kills all bacteria and fungi
- Cleans and disinfects in one operation
- Safe to humans and animals
- Can be sprayed around and even on animals

ON FARM

Before leaving any farm, we clean all our gear, dispose of all consumable products used and disinfect our vehicles and equipment using **Antigerm S33**.

If you have any questions regarding our bio security procedures please give us a **call on 03 662 8015**
